

WAYS TO KNOW IF CONSULTING IS RIGHT

FOR YOU

FOCUSED PROJECTS

Do you get bored easily? Find yourself wanting variety in your professional life? Consulting may be for you - projects typically last 3-6 months, and move from industry to industry - perfect for those with short professional attention spans!

HIGH IMPACT WORK

Excited about the possibility of doing something meaningful? Want your work to drive the decisions of Fortune 500 companies? Another surefire sign consulting may be a good fit for you. Be warned, however: high-impact work also means high stress and long hours.

SOLVE QUANT PROBLEMS

Love numbers? Then consulting is for you! Every recommendation must be backed by data. You'll be spending 90% of your day on the job in Excel.

PROFIT DRIVEN ORGS

This may seem obvious, but bear with us: you'll be working for profit driven organizations. If you're morally against cigarettes, you may still have Phillip Morris as a client. Or, if you're a pacifist, you may still have to work for a big defense contractor. Know going in that your #1 job is to make organizations more profitable.

HEAVY TEAMWORK

In consulting, you will be with your team All. The. Time. There's just no escaping it. If you love collaborating and tackling tough projects with smart colleagues, consulting may just be for you.
